

DEATH STAR
ELEVATION PLAN

- 1 Main exhaust port

2 Thermal exhaust port

3 Secondary power converters

4 Central power column

5 Tractor-beam reactor coupling

6 Tractor-beam generator tower

7 Emergency radiation discharge

8 Main power generator

9 Hypermatter reactor

10 Concentric surface decks

11 Ion sublight engines
- 12 Ion-drive reactor

13 Atmosphere processing unit

14 Water tanks

15 Overbridge

16 Superlaser power cell

17 Primary power amplifier

18 Firing field amplifier

19 Induction hyperphase generator

20 Targeting field generator

21 Primary beam focusing magnet

22 Carrier beam crystal
- 23 Magnetic shielding

24 Superlaser tributary beam shaft

25 Hyperdrive

26 Power cell

27 Central computer core

28 Sector computer cluster

29 Heat exchanger

30 Stellar fuel bottles

31 Cooling system

32 Refinery

33 Fuel collector

EXTERIOR

- 31 Quadanium steel outer hull

32 Polar trench

33 Superlaser focus lens

34 Equatorial trench

35 Mid-hemisphere trench
